Project Overview

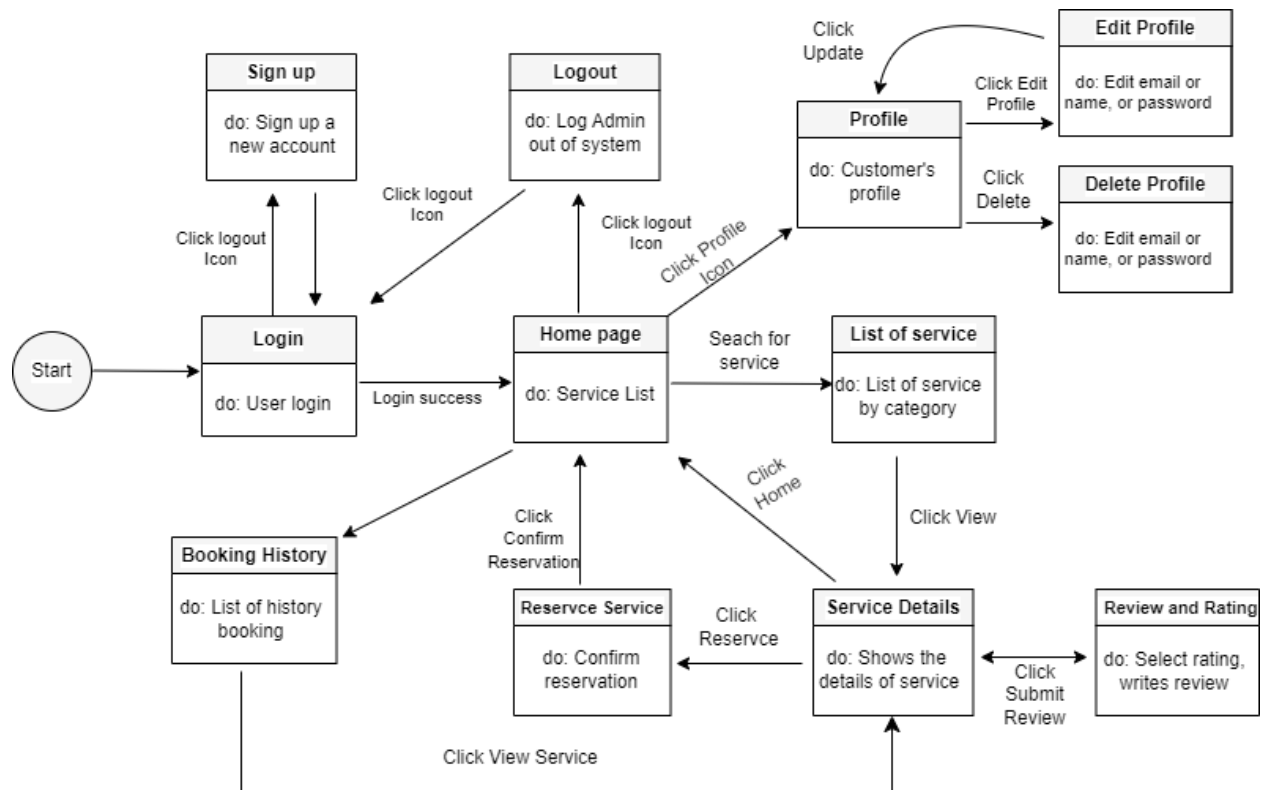

The G4 is a web application that connects customers with service providers for activities such as hotels, entertainment, and restaurants. Customers can browse, filter, and book services, while service providers can create and manage activity listings. Users can also leave reviews for services they have experienced. The platform features a SysAdmin role responsible for managing user and provider access and moderating reviews to ensure appropriate comments. This ensures a seamless and safe experience for both customers and providers.

Scenarios with Screenshots

User

The screenshot shows a web browser window with the address bar displaying "localhost:8080/users/login". The browser's tab bar shows three tabs: "New Tab", "All Vehicles - Enterp...", and "powertech-center/cl...". The main content area has a solid yellow background. In the center, there is a white rectangular login form with a green border. The form is titled "Login" in green text. It contains two input fields: "Email" with the placeholder text "Enter your email" and "Password" with the placeholder text "Enter your password". Below these fields is a green "Login" button. At the bottom of the form, there is a link that says "Don't have an account? [Sign up here.](#)".

Update Service

The screenshot shows a web browser window with the address bar displaying `localhost:8080/services/update/1`. The browser's tab bar shows three tabs: "New Tab", "All Vehicles - Enterp...", and "powertech-center/cl...". The browser's address bar also shows "All Bookmarks".

The main content area of the browser displays a "Provider Dashboard" header. Below the header, there is a "Update Service" form. The form has a blue header bar with the text "Update Service". The form fields are as follows:

- Service ID**: A text input field containing the value "1".
- Service Name**: A text input field containing the value "Pasta Paradise".
- Description**: A text area containing the value "A cozy Italian restaurant with a variety of pasta and pizza.".
- Price**: A text input field containing the value "20.99".
- Location**: A text input field containing the value "New York, NY".
- Category**: A text input field containing the value "Restaurant".
- Status**: A dropdown menu with the value "Select Status" and a downward arrow.
- Upload Image**: A label for an image upload field, which is partially visible at the bottom of the form.

Installation

- Get the project

- clone

`git clone <https://github.com/nhung-ngo/G4-Group-4->

- Open the project in IntelliJ.
- switch the branch to "Final" branch
- [/src/main/resources/application.properties] file is the configuration for the MySQL database on your localhost.
 - the database name is on the datasource.url property between the last / and the ?. In this case the database name is g4.
 - You MUST have the database up and running before running the project!
 - Open your XAMPP Control Panel.
 - Start the Apache server.
 - Start MySQL.
 - Click on MySQL "Admin" to open up the DBMS.
 - Ensure the database that you need is available.
- Build and run the main class.

Instructions

Log-in and sign-up

- We Can start with <http://localhost:8080/users/login>
- It will lead to login page for user.
